Election/Restrictions

Applicant's election with traverse of Group II (claims 20-30 and 38-42) in restriction in the reply filed on 9/24/04 is acknowledged. The traversal is on the ground(s) that the inventions cannot be restricted since they have the same or a corresponding technical feature. This is not found persuasive because the claims do not have the same or a corresponding special technical feature. The special technical feature is defined by the convention as that which enables the invention to overcome the prior art. Looking at claims 11 and 31, the only structure required in the straw-supporting member is that it is adapted to be subject to elastic deformation. The rest of the claim is directed to coupling together the cover and the device and causing the straw supporting member to move from a first position to a second position. Claim 22 is directed to a straw supporting member having an elastically deformable arm, a succession of deformable lips, and a straw retaining means. The straw-supporting member is adapted to be coupled to a container. Claim 38 is similar but does not claim the lips. Claim 22 does not require the cover or the container. The claims do not have the same special technical feature. The reference to Prieto (EP 0 926 080) teaches the straw-supporting member is elastically deformable and that the cover is secured to the can. Therefore these elements cannot be the special technical feature. The only feature is the movement from a first position to a second position of the straw supporting member. Claim 22 does not have the movement in the claims. This cannot be the special technical feature as it is not present in claim 22 or claim 38. For the above reasons the inventions lack unit of invention.

Art Unit: 3727

Applicant has presented new method claims 44 and 46 which depend from claims 38 and 22 respectively. The reference to Prieto (EP 0926 080) teaches the structure in claims 38 and 22. The methods must therefore rely on the method steps to overcome the prior art. The claims do not have unity of invention are withdrawn as being drawn to the non-elected invention.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 22-25, 27-30, 38-43, and 45 rejected under 35 U.S.C. 102(b) as being anticipated by Prieto (EP 0926 080). See where the structure is shown in Figs. 12-15. The deformable lips are seen on the periphery of 9.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

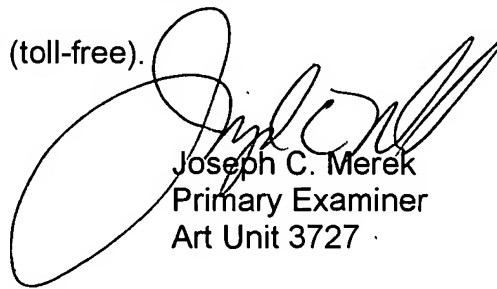

Art Unit: 3727

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
